DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-17 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by *Farace et al* (US 5,995,863).

Farace et al anticipate all claimed features in claims 1-17.

Claims 1-3, 6-8, and 11-14: Farace et al disclose a method and apparatus of MRI data acquisition comprising the steps of selecting T1 and T2 weights MR pulse sequence to characterize specific body parts, organ, or tissue where the pulse sequence is used to calculate the selected MR parameter. The steps further comprise a multiple pulse sequence with specific parameters to characterize the tissue, organ or body part. The characterization includes tissue properties such as histological, biochemical, histochemical and biomechanical and these properties are correlated to the MR parameters (col. 2, line 51 col. 3, line 30; col. 4, line 6 – col. 5, line 67).

Claims 4, 5, 9, and 10: Farace et al disclose that the MR data is presented in image format, which includes either color or black and white.

Art Unit: 3737

Claim 13: Farace et al disclose that the MR data is evaluated pixel-by-pixel basis (col. 9, lines 17-22).

Claims 16 and 17: Farace et al disclose in figures 3 where the MR data are represented in histogram.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bartzokis et al (US 5,322,682) and **Mountford et al** (US 5,318,031)
